

## Plan Campaign For New Hospital

A decision was reached Monday night at a meeting at the home of the planning board of the Grayling Mercy Hospital to conduct a campaign immediately for funds for the building of a new and modern Grayling Mercy Hospital.

Before any announcement of the objective of the fund drive, it will be necessary to obtain estimates of the building costs. The drive quota will be known by next week and will be published along with the building's estimated cost.

The Grayling Mercy Hospital has been serving the people of Grayling, Crawford County, Roscommon County and parts of the adjoining counties for 42 years and this will be the first major appeal made in its behalf.

The campaign and building program is taking place as the present building is constructed of wood and is outmoded as far as modern hospital service is concerned.

## CARL M. SORENSON PASSES AWAY

Carl M. Sorenson passed away at Mercy Hospital at 11 p. m. on Wednesday, June 24, after a prolonged illness.

He was born Sept. 18, 1889 to Carl and Marie Sorenson. His early youth was spent in the Hamlinville, Minn. where he became a barber and opened his first shop in the old Barton Hotel building. On Jan. 4, 1914 he was united in marriage to Camilla Fischer to whom four children were born.

Many will remember Mr. Sorenson as one of Grayling's leading bankers for many years. Mr. and Mrs. Sorenson at one time owned and operated the Fischer Hotel, now Smugglers Hotel. He had served his community as a member of the County Road Commission, and as Township Clerk. He was a member of the Masons and the Grayling Evangelical Lutheran Church. A charter member of the Grayling Sportsmen's Club, he was one of the organizers and held office as their first treasurer. In December 1936 Mr. and Mrs. Sorenson moved to their present location and opened a cabin court under Mrs. Sorenson's management.

For all the years that Mr. Sorenson was in business he was highly respected and liked by his many friends and business associates. He was an ardent sportsman who loved to hunt and fish in the woods and streams around Grayling where he spent his entire life. Although quiet and unassuming by nature, his influence was felt by his entire family to whom he was a devoted husband and father. His passing has been a decided loss which is felt by many.

The deceased is survived by his widow, two sons, William and Robert of Grayling and two daughters, Mrs. Lois LaGrow of Grayling and Mrs. Evelyn Jones of Eagle; 13 grandchildren; two brothers, Herluf of Grayling and Alvin of Chicago.

Services were held Saturday, June 27 at 2 p. m. from the Grayling Evangelical Lutheran Church with Rev. John Enselman officiating. Burial was in Elmwood Cemetery where his brother, Rev. Alvin Sorenson gave the final benediction. Serving as pallbearers were his cousins Otto and T. P. Nelson, Gordon Pond and Harry, Carl and Thorwald Sorenson.

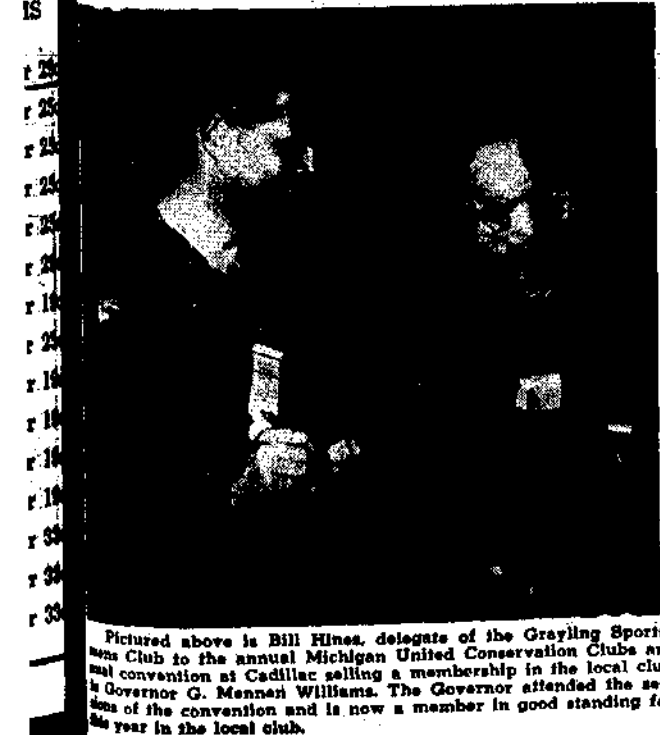

## Arnold Hubbell Nets

Arnold Hubbell of Grayling landed a 37 inch, 15 pound and once brown trout on the Muskegon River Sunday night, just before dark.

Hubbell used a caddis fly on a 10 pound test leader with a 4 ounce hook. It is expected that the huge trout will set a Michigan record for a brown trout caught on a fly. He was accompanied by the Conservation Department. The picture will be published next week. Hubbell is having the prize catch mounted. It was said.

Mrs. Don Feldhauser is the new girl at the office of Dr. J. Cook.

Four Crawford County youths were injured early last week when the car in which they were riding missed a curve in Roscommon County six miles west of Roscommon and overturned.

Driver of the car was Keith Johnston, 17, of Beaver Creek Township, Crawford County, who told officers he failed to see the curve in time to negotiate it. As a result the car, ran off the highway onto the shoulder and rolled over, coming to a stop on its wheels. The car was demolished.

Johnston, who suffered minor bruises in the wreck, was released after treatment at Mercy Hospital in Grayling.

Also released from Mercy Hospital after treatment and a few days confinement was Leon Granter, 16, of Grayling who suffered severe bruises about the right arm and shoulder.

On Monday, Jerry Boone, 16, of Grayling who had suffered a skull fracture and right shoulder fracture, was taken to Blodgett Hospital in Grand Rapids. The contractor will have 180 days to complete construction of six new mess halls and eight bathhouses from federal funds allotted to Michigan.

## Ohio Ground Troops, Airmen From Kentucky, W. Virginia, N. Carolina

### About 3,000 Troops In All Expected

Summer training for National Guardsmen, both air and ground, at Camp Grayling and at the Grayling Air Base, will get underway this week end with non-Divisional units of the Ohio National Guard arriving at Camp Grayling and Air National Guardsmen from Kentucky, West Virginia and North Carolina arriving at the Grayling Air Base this week end.

About 3,000 troops in all are expected in for training during the next two weeks. The Ohio ground troops are expected to number about 2,000 while the airmen will number about 1,000.

Advance units of the Ohio non-Divisional troops are expected into camp today, according to an announcement by State National Guard officials in Lansing.

No Guard trucks will be on highways between the evening of July 2 and early morning of July 5, however, highway department officials said.

Most of some 2,000 Ohio troops will arrive early July 6 on highways US-223, US-127, and "M-32" converging in Jackson on US-27 and remaining on that highway to Camp Grayling.

The July 6 contingent will be transported in buses.

Ohio Guardsmen are using Michigan's Camp Grayling because the Ohio camp is being used by federal troops.

Ohio units to train at Camp Grayling include 168th RCT, 107th Armed Cav. Reg., 372nd Inf. Bn. (sep), 3640 Ord. Maint. Co., 127th MP Co. and Ohio State Hq. and Hq. Det.

The Ohio ground troop and the airmen from the three southern states will train in Grayling until July 19 when they will leave for home. Following a week's lapse, the 38th "Cyclone" Division from Indiana will move into Camp Grayling on July 26 while the Ohio Air Guard will move into the Grayling Air Base on the same day. The 38th Division will number nearly 8,000 officers and men while the Ohio Air Guard will bring nearly 1,800 troops. These two units will train until August 8. Again the Camp and Air Base will be quiet for a week.

On August 15, Michigan's 46th "Iron Fist" Division will move into their summer training home, nearly 8,000 strong and on the same day between 800 and 900 Michigan National Guardsmen will move into the Grayling Air Base. The Michigan ground and air troops will train until Aug. 29 when they will leave for their home stations.

On this busy schedule almost 22,000 troops will be trained at Camp Grayling and at the Grayling Air Base this summer. It appears, however, as though this would be the last summer in which the air troops would train at the Grayling Air Base as the expansion plans of an Air National Guard training camp at Alpena seem to be progressing.

In preparation for Camp Grayling's influx of out-of-state Guardsmen, command and general staff officers representing the out-of-state units gathered with Michigan National Guard officers May 23 - 24 for an orientation conference.

Divisions included coverage of administrative details, camp facilities and logistical considerations.

### Tell Of Measles Treatment Method

A rather large number of cases of measles in the Grayling area have been brought to the attention of the health department. We would like to call the attention of parents to the very satisfactory methods of treatment in measles, especially in children who seem to be unusually ill. Children should be kept quietly in bed and if fever persists or if they have a cough which hangs on, the family physician should be consulted. We would like to also call attention of parents to the use of immune globulin as a preventative of measles or as a method of reducing severity in measles if given in about five or seven days. This is especially important in extremely young children or children who have been run down from other illness which would make measles a severe disease in many instances.

## We Must Produce More Food

The population of the United States is soaring. At present the increase runs to 7,000 persons a day. Government experts predict a 20 per cent population jump in the 1950-60 period alone.

These people must be fed—and fed, for the most part, on what can be produced on our croplands, which the 1950 census put at 336,349,000 acres.

The experts also say that if our present living standards are to be maintained through 1975, it will be necessary to bring 100,000,000 more fertile acres into production. Yet even optimistic forecasts hold that only 50,000,000 currently unproductive acres can be cleared, drained, irrigated and improved by 1975. We are presently bringing in only 2,000,000 acres a year and more than half of this is offset by the expansion of cities, towns and industrial areas.

The meaning of these forecasts and figures are clear. Unless we are to suffer a decline in living standards, we must get more and more food and fiber from our productive land. And that means the intensified application of scientific production practices and better land utilization.

Fortunately, that is not a visionary goal. Farmers and land owners are practicing conservation farming on an ever-increasing scale and in a manner that would have been impossible a few years ago. The best conservation and land use practices require machinery that was non-existent fifty years ago, but which is now standard farming equipment.

The agricultural future of the United States, and of the world for that matter, lies in maximum use of power-driven implements by farmers and ranchers who realize that the machine—rather than a futile search for new land—provides the solution to feeding our expanding population.

**YOUR MILK...**

You may think not, but your actions tell what you are. When you talk often something slips out that you meant to hold back. And your smile may give you away what you are thinking about. How and what you eat tells all about your disposition. When you walk, the wife can tell if you have sneaked out for a drink. By what you read can be told where your interest lies. When you work it is easy to tell if you are lazy. When you buy, the clerk knows if you are a bargain hunter. And if you are always right and lose your temper over trifles, you go on the list as a bad risk. When you can not see any good in anyone but yourself, you are selfishly branded. It's all right to be thrifty but if you save all you are down as a miser. And if you try to act better than you are, you are fooling no one but yourself. When you play and get angry when you lose, you are lined up as a bad sport. We want to give you the best milk possible. Your satisfaction is our success. If our milk is bad, tell us. If it's good tell everybody. Buy this milk from Hunter's AuSable Dairy.

## NEW BOAT SAFETY LAWS

Michigan's new boat-safety regulations are attracting nationwide attention. Henceforth every one of the many thousands of boats rented to the public must measure up to rigid specifications set up by the Michigan Waterways Commission. Regulations are going to be enforced, and inspections made by local sheriff departments throughout the State. It's a big job, and one that is bound to result in some confusion before successful application on a widespread basis.

### Specifications Detailed

The capacity of any given boat is determined by a well defined formula in which the length, width and depth of the craft are deciding factors. Once this passenger capacity is determined, a metal tag affixed in plain sight, will state how many people may be aboard. A child, regardless of age, is classed as a "person" in this specification.

Each boat will carry a stenciled emblem on the side marking the waterline. If this stencil is submerged the boat is overloaded.

Carlocks must be attached to oars, and oars must be fastened to the boat proper by a length of line or chain—a regulation which will prevent the loss of an oar when such a loss might mean the difference between life and death.

Planking thruout the craft must be sound. The inspector will check this with the sharp point of a knife to detect any possible weakness. Life preservers must be supplied for every passenger.

### Costly Law

On the surface our new safety regulations look costly—both from an enforcement standpoint, and from the viewpoint of the boat livery operator. Many rickety old boats once rented by irresponsible liveries must be junked. But in the long run all concerned should welcome the new set of rules. Livery operators will be required to pay 50c per boat for the tag of approval following inspection, and as a result slightly higher rental prices can be expected throughout the state. While this may seem to be overburdening a public already reeling from the high cost of everything, it's a small price to pay for a life saved—a life that might be yours or mine.

Furthermore the regulations will make good ammunition for tourist advertising in Michigan, where the importance of the tourist dollar cannot be over-estimated—an "industry" second only to the automobile business in cash value.

More safety afloat is sure to reflect favorably on the future of Michigan Outdoors.

Mort Neff's "Michigan Outdoors" television show can be seen every Thursday over WWJ-TV, Channel 4, in a thrilling full half-hour show—10:00 till 10:30 p.m. DON'T MISS IT!

## Bad Case of the "Ztutters"

Our copyboy is out sick. So the  
editor (me) is taking over some  
of his chores—which include run-  
ning the addressing machine on  
"mailing-out night."

Last week I didn't have the  
usual number of papers left over  
for sale at the office. Couldn't fig-  
ure what had happened—until  
Chub Zimmer called to ask why  
he'd gotten 56 copies.

Then I realized—"Zimmer" is  
the last name the machine prints.  
Guess I forgot to turn it off  
and it just kept grinding out  
Chub's name on all the remain-

ing copies. That machine just  
didn't know when to stop.

From where I sit, people are  
like that sometimes. They often  
don't know when to stop. Like  
those who are prejudiced against  
someone with an accent, perhaps  
... or against someone who likes  
a cool bottle of beer with his sup-  
per. So, in these columns I try to  
persuade everyone to "throw the  
switch" on prejudice so it won't  
get repeated.
